WHOLESALE PRICE LIST

for

1944 - 1945

To Our Customers and Friends:

Withstanding the most difficult circumstances, we enjoyed a very gratifying business last season. We feel that this was the result of our customers' and friends' warm support and patronage. We take this opportunity to express our great appreciation to you.

We greatly regret that we were obliged to return practically all orders received after the middle of February on account of labor shortage and a very limited supply of packing material. The present condition seems no better and we fear that we may be confronted again with the same situation; therefore, we beg to advise you to please bear this matter in mind and send your order as early as possible.

Our Victory seems to be not so far in the future. We should prepare now to meet the demands of the post war. It is our sincere aim and pleasure to help you along these lines.

Sincerely yours,

OVERLOOK NURSERIES

TERMS OF SALE

(Please read carefully when ordering)

PRICES—5 and 50 of the same variety and size at 10 and 100 rates respectively. For larger quantity than listed inquire. When the price of a single plant is not listed under "Each" add 25% to the 10 rate. All quotations are for immediate acceptance subject to prior sale.

DISCOUNT of 3% offered for orders with cash. Attractive discounts for B&B stock in truck or car-load lots.

ADDITIONAL CHARGES to the listed prices will be made when the customer marks or selects plants in the nursery.

MINIMUM ORDERS—We will not accept orders of less than \$3.00.

TERMS OF PAYMENT. Cash with order for immediate shipment. Booking orders will be accepted when accompanied by remittance covering 25% of the purchase amounts. C. O. D. orders accepted with a deposit of 25%.

SUBSTITUTIONS. In case you do not desire substitution with the nearest sort, color or size please state clearly on your order "No Substitution."

PACKING CHARGES. Free packing for cash orders. At cost in other cases.

TRANSPORTATION. Please state whether order is to be shipped by parcel post, express, rail or motor freight. When no instructions are given we will use our judgment.

For parcel post shipments be sure to remit amount sufficient to cover postage; otherwise instructions are void.

Our responsibility ceases upon delivery to forwarding companies; claims for damages in transit should be made upon the latter.

LIABILITY. We are not liable for injury to stock from any cause beyond our control. Unless we make the plantings and are remunerated for it, we give no guarantee that the stock will live and grow.

CLAIMS. If, by any possibility, an error has been made please notify us immediately. We will be pleased to promptly rectify the mistake.

REMARKS. Lining out stock is listed here in light face type.

(C) indicates "from cutting," (S) seedling, (G) grafting. (T) indicates once transplanted, (TT) twice transplanted, etc. All lining out stock is in bare roots unless otherwise indicated.

Specimen stock is listed in bold face type; B&B means balled and burlapped.

NOTICE. This price list cancels all previous quotations and are subject to change without notice.

Federal or state taxes levied upon sales may be added to the prices herewith quoted.

AZALEAS

A few cultural suggestions:

1. Azaleas thrive in acid soil. Use plenty of leaf mold (oak leaves most desirable), pond muck or peat moss.

2. Lime or alkaline soil is poisonous. In case the Azaleas are to be planted in such a soil, remove original soil and use plenty of leaf mold or peat moss mixed with the other soil which should contain no alkali; or if alkaline apply Aluminum Sulphate at the rate of one 4 inch pot full to a wheelbarrow of soil.

3. As the azalea root system is very shallow, it dries fast. Apply sufficient water to keep roots moist always.

4. Azaleas delight in a moist soil but it will not tolerate a water saturated soil condition; so Azalea beds should be made where all surplus water will run off quickly.

5. Azaleas thrive best in partial shade (when the bush grows larger it will stand the full sunlight) but many good blossoms cannot be expected if the bushes are planted under complete shade.

6. The Azalea is not a gross feeder. If plenty of leaf mold or like organic matter is applied, it does not require any commercial fertilizer. On the contrary, very often a heavy application of fertilizer injures the root system. However, if necessary a light application of well rotted cow manure, sheep manure or commercial fertilizers such as Vigoro is beneficial.

7. Red Spider and Thrips sometimes trouble the plants. Frequent spraying of the plants with plain water will usually keep this trouble away. If this does not work, spray or dust the plant with a sulphur mixture.

INDICA AZALEAS

This group is the most popular of all azaleas along the Gulf Coast region and up to Charleston, S. C. The flowers are very large and single of various colors. They are fast growers and grow into large bushes.

COCCINEA MAJOR — Brilliant orange red, very low grower. Compact. (We can supply only 18-24 inch specimen).

CRITERION — Variegated pink and white. Low grower. (Rooted cuttings and 2 year old liners).

DAPHNE SALMON — Light salmon. Upright grower, hardy. (Rooted cuttings, 2 year and 3 year old liners, 2-3 feet specimen).

DUC DE ROHAN — Salmon pink, compact, low head grower. (18-24 inch and 2-3 feet specimen only).

ELEGANS — Very early, pink, (Rooted cuttings, 3 year liners and 2-3 feet specimen).

FIELDER'S WHITE (Rooted cuttings, 2 and 3 year liners only).

FORMOSA — Lavender pink (Rooted cuttings, 2 and 3 year liners and 2-3 feet field (cut back)).

GULF PRIDE — Light purple (Rooted cuttings, 2 year liners, 18-24" and 2-3 feet specimen).

INDICA ALBA — White (rooted cuttings only).

IVERYANA — White occasionally striped with pink. (18-24" only).

LADY EDITH — Variegated pink and white. (12-18" only).

MAXWELL WHITE — (Rooted cuttings, 2 year liners only).

PERFECTION — (Fisher's Pink). Large pink flowers, middle season. (Rooted cuttings, 18-24" and 2-3 feet).

PRESIDENT CLAY—Orange red (Rooted cuttings, 3 year liners and 2-3 feet specimen—cut back—).

PRIDE OF MOBILE—Watermelon pink. (Rooted cuttings, 18-24"—cut back—, 2-3 feet--cut back--)

PRINCE OF ORANGE—Orange red. (Rooted cuttings, 18-24" only).

VIOLACEA RUBRA—Purplish red. 18-24" only).

VITATA FORTUNEI—(2 year liners only).

Partial View of Azalea Lath House

BELGIAN AZALEA

The varieties that belong to this group produce very large double or semi-double flowers of various brilliant colors and variegations. Undoubtly, this is the most improved azalea of all. Very slow grower and rather delicate for outdoor growing, therefore, used extensively for pot plants. We can supply the following varieties:

ALBERT ELIZABETH — white with frilled deep pink edge.

BLUSHING BRIDE — late bloomer of beautiful blush pink.

COUNT DE KERCKHOV — variegated rose pink with white edge.

TRIUMPHE — Dark crimson.

VERVAENEANA—Variegated, white with salmon red throat.

VERVAENEANA ALBA—Pure white.

KURUME AZALEAS

Commonly called Dwarf Azalea. This group is gaining popularity not only as a pot plant for florists' use, but for outdoor plantings. The flower is small, but is a profuse bloomer. Plants are dwarf and slow growers, and are very hardy.

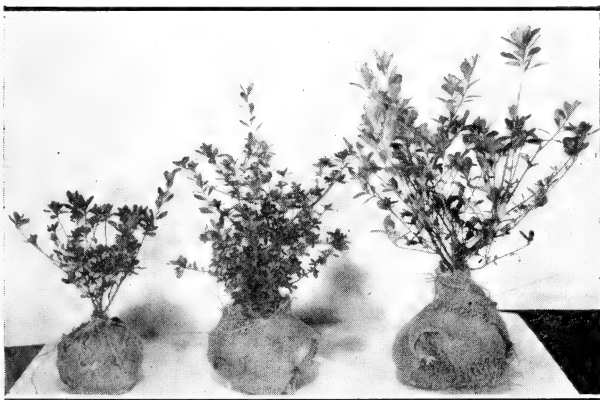

Six most popular varieties:

CHRISTMAS CHEER — Bright Christmas red.
(Rooted cuttings, 3 year liners, 8-10", 10-12").

CORAL BELL — Soft pink. (Rooted cuttings, 2 year liners, 6-8", 8-10").

HINODEGIRI — Cerise Red. (Rooted cuttings, 2 year liners, 6-8", 8-10").

PINK PEARL—Cherry rose color shading lighter to center. (Rooted cuttings, 3 year old liners, 18-24").

KURUME AZALEAS

Left to Right: 6-8 inch, 8-10 inch, 10-12 inch

SALMON BEAUTY—Salmon pink. (Rooted cuttings, 2 year liners, 6-8", 8-10", 10-12").

SNOW — Pure white. (Rooted cuttings, 2 year liners, and 6-8").

Besides the above varieties. we have a very limited supply of the following varieties:

AMOENA COCCINEA—Pink. (Rooted cuttings, 3 year liners, 8-10").

APPLE BLOSSOM — White shaded with pink. Rooted cuttings, 3 year liners, 10-12", 15-18", 18-24").

BENIGIRI — Bright deep pink. (3 year liners, 10-12" only).

BRIDE MAID—Salmon red (Rooted cuttings, 3 year liners).

CARMINE PRINCE—Carmine red. (Rooted cuttings, 10-12", 12-15" and 18-24").

DAYBREAK — Light pink. (10-12", 12-15", 18-24").

FLAME — Brick-dust red, blooms very early. (Rooted cuttings, 3 year liners, 10-12", 12-15", 18-24").

HEXE—Crimson red (Rooted cuttings only).

MAUVE BEAUTY—Lavender. (Rooted cuttings, 12-15").

BEACH BLOW—Light peach pink. (12-15" only).

SALMON QUEEN—Light salmon. (10-12", 12-15" only).

YAEGIRI—Brick-dust red. (10-12", 12-15", and 18-25").

NEW KURUME AZALEAS

HIME-KAGAMI—Medium to small hose-in-hose flower. White with occasional stripes of faint pink. Very heavy bloomer. Vigorous, compact grower.

KIN-TAIYO—Large hose-in-hose with long white petals which are edged with bright orange. The flowers are very attractive and distinctive.

KUMOI—The flower is hose-in-hose medium to large with somewhat crinkled petals. Color: Light crimson-carmine with less coloring at the throat. Leaves are medium to large and shiny green.

MIZU-NO-YAMABUKI — Flower small, hose-in-hose; color is creamy white. This is the only variety of the several hundred Azaleas producing a yellowish flower. Leaves very small and a very compact grower.

YAKUMO—The flower is of medium size, hose-in-hose with roundish petals of maroon red. Leaves are roundish and medium; very compact.

MACRANTHA AZALEA

Azaleas that belong to this group bloom very late, generally in May and June; and some throughout the entire summer. Those desiring to have azaleas in bloom after Spring should try these varieties.

The flowers are very large, some are single, some are hose-in-hose, while others are full double. There is a wide range in color. Very compact growth with small, glossy dark green foliage. Makes most desirable plant for the landscape even when not in bloom. Very hardy.

- BENI-KIRIN**—Double flower, brilliant blood red.
- FUJI-NISHIKI**—Very large flower with wavy petals. White striped with faint narrow lavender lines.
- GUMPO**—One of the most dwarf azaleas. Large white flower. Ideal for rock gardens, borders, as well as pot plant.
- IZAYOI**—Single large flowers, three inches across. Pleasant flesh pink.
- MACRANTHA**—Single, clear pink.
- MACRANTHA DOUBLE**—Clear pink, double flower.
- RED MACRANTHA**—Large single flower, dark orange red.
- OKINA-NISHIKI**—Orange red, hose-in-hose. Blooms twice a year (spring and fall).
- SAKURAGATA**—Single, dark crimson with large patch of white in the throat.
- WAKAMATSU**—Single, very large flower of delicate purple.
- WAKAEBISU**—Large flower with round petals, hose-in-hose, bright salmon pink.

KAEMPFERI AZALEAS

Very hardy plant with large blossoms. Its resistance to cold is greater than any other evergreen azalea. Grows rather slender and tall instead of spreading.

BETTY—pink.

FEDORA—deep salmon rose.

MARY—deep pink.

OTHELLO—orange red.

PURPLE KING—purplish rose.

Prices on Kaempferi Azaleas:

CAMELLIA JAPONICA**Brief Cultural Hints**

Soil—Camellia grows in almost any soil, but well drained, good garden soil a little acid in reaction is more suitable.

Location—Half shady location is preferable, especially when the plants are young. Free blooming cannot be expected in a place entirely shaded.

Transplanting—The root system of the Camellia is rather course and not quite so easily transplanted as the Azalea.

Fertilization—The Camellia is a gross feeder; it responds well to fertilization. At the time of planting, if the soil is not fertile enough, use a mixture of one-half of garden soil, one-fourth of well rotted cow manure and one-fourth of peat or leaf mould. Every winter or early spring apply well rotted cow manure; bone meal or cotton seed meal, or similar commercial fertilizer may be added if necessary. Mulching with half rotted leaves or peat is also beneficial.

Watering—The Camellia loves a humid atmosphere. Do not neglect the watering. Frequent syringing on the leaves helps a great deal during the dry summer months.

Pruning—Proper pruning is also essential. Prune with care such as water shoots, dead or injured branches and branches growing too close together. General pruning should be done in the month of February; otherwise it may have a bad effect on the flower buds.

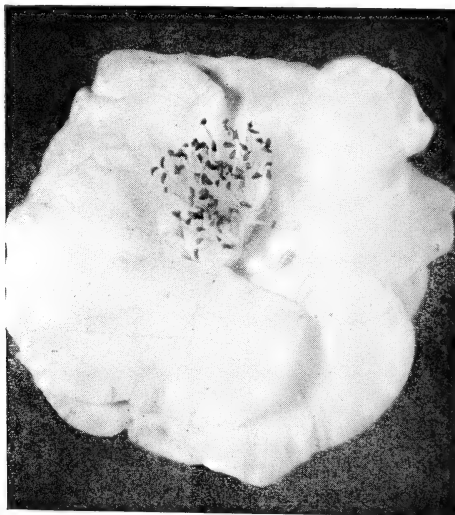

Spraying—Red spider and various scales may attack Camellias. We have been using "Volck, Jr." or "Florida Volck" at the ratio of 1 to 50, adding one to two teaspoonsful of Black Leaf 40 to every gallon of solution. Avoid, if possible, spraying in late Fall or during the winter as a severe freeze causes great damage to camellias if it hits right after spraying. This is especially true if oily material is used.

NEW CAMELLIAS FOR 1944

For the last few years we have introduced, every season, some of our new camellias, all of which have proven to be real gems. Again we introduce with great pleasure the following new camellias. (Our supply is very limited. No discount on this class.)

ROBERT NORTON (Our Seedling #156)

Large semi-double flower, usually 4-5 inches in diameter. Composed of 17 large and thick obovate petals and numerous stamens at the center. Color is white with one or two narrow pink stripes. Oftentimes sports a solid salmon pink flower. The sport is called Jean Norton. The leaves are medium to large, obtuse, and of leathery texture. Early bloomer.

Camellia Robert Norton

ROSE MALLOW—(Our Seedling #126).—At one time we called this Pink Hibiscus.

Very large semi-double flower of mallow type. It is often 6 inches in diameter. It is composed of 16 large broad petals, somewhat creped in texture. Color soft pink with darker veins. Late bloomer. The leaves are extra large and roundish-

ROYAL WHITE—(Our Seedling R).

Very late bloomer. Flower is very large, generally 4-5 inches across. Some are full double, imbricated, while others are semi-double with yellow stamens. Pure white in color. Leaves are large, round and thick. Low and compact grower.

VICTORY MAID—(Our Seedling V).

Also very late bloomer. Medium sized flowers, some full double, imbricated; some are semi-double with yellow stamens. Pure white. An ideal flower for corsage work. Leaves are small and thin. Compact, but slow grower.

WHITE GIANT—(Our seedling C).

Very large semi-double pure white flower, often measures over 6 inches in diameter. The shape, color and size of this flower resembles closely the Lotus, but we have found that this variety blooms much more freely than Lotus. Blooms mid-season. The leaves are very large and extra dark shiny green occasionally variegated with white. Very vigorous upright grower. The name of "Giant" truly signifies this variety.

SAWADA'S CAMELLIAS

Since 1916, our Mr. K. Sawada has devoted much of his time to produce new varieties of camellias. His tireless efforts in this enterprise has been rewarded. Within the last few years we have introduced 24 of his new camellias. They are all outstanding in every respect. We have been informed that last season many of our Sawada's camellias always rated the highest honors and admiration of everyone at all the camellia shows along the Gulf Coast.

These varieties are yet very scarce; also, our supply this year is very limited. We fear that we may not be able to fill your order unless orders reach us very early in the season. No discount on this group.

MRS. K. SAWADA (U. S. Patent #481)

(See picture on front cover).

This beautiful camellia was named "Mrs. K. Sawada" in memory of the late Mrs. K. Sawada. She devoted much of her time in helping the development of these new varieties.

The flower is full double, gardenia-type, imbricated. It is 3 to 3½ inches in diameter, consisting of 70 to 100 petals. Color is delicate pink, shaded on white. The flower resembles the flower of Lady Humes Blush somewhat, but is slightly larger in size, blooms heavily from February to March. The lasting quality as a cut flower is exceptionally good. The leaves are small, of finer texture, very vigorous, upright grower, very compact, with long, slender branches. Its resisting power against the freeze is very great.

Many florists who have seen this flower agree that this is the most ideal Camellia flower for their corsage work.

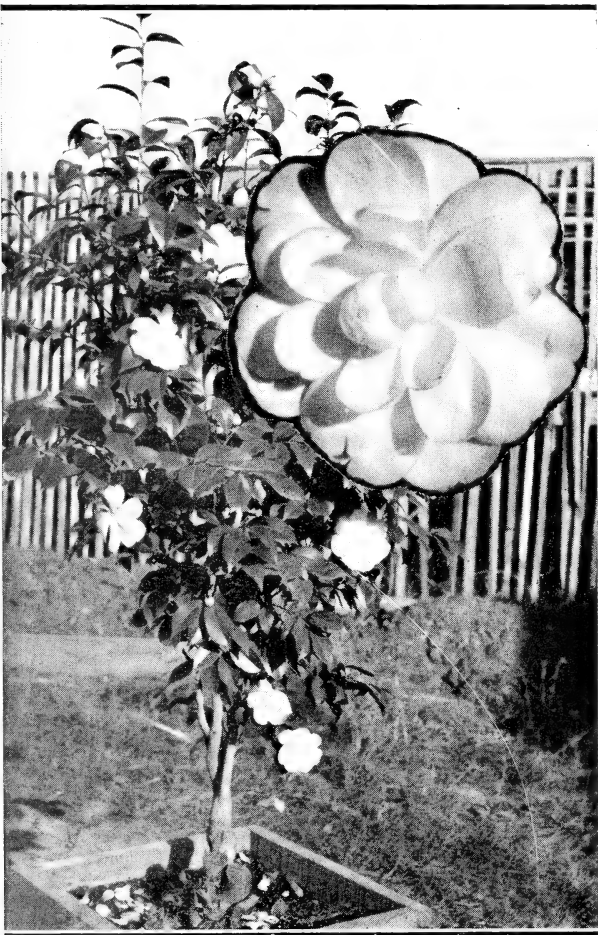

K. SAWADA (U. S. Patent No. 431)

This most outstanding new Camellia was developed by us. The flowers are of pure white, very double, and fully imbricated. It is usually 4-5 inches in diameter, but often much larger. It has 50-70 petals, the edges of which are rolled inward and are symmetrically overlapping each other. When the flower is fully opened it sometimes shows a few small petaloids or yellow stamens in the center. It blooms from January to March, a very heavy and free bloomer. The leaves are medium in size and thickness, elliptical to lanceolate, and serrated, and leathery and dark green. Growth is very vigorous, semi-upright, and very compact and symmetrical. This new Camellia is much hardier than Alba Plena. Everyone who has seen this new Camellia agrees that it is the best white Camellia we have ever had in this country. This is the most profitable variety for cut flowers.

Camellia K. Sawada

BLUSH HIBISCUS—(Our Seedling B)

A very large single to semi-double flower resembling the giant Mallow Hibiscus. The color is white with blush pink at the center. A very beautiful flower. A very vigorous grower with large dark green leaves.

IMURA—(Our Seedling #12)

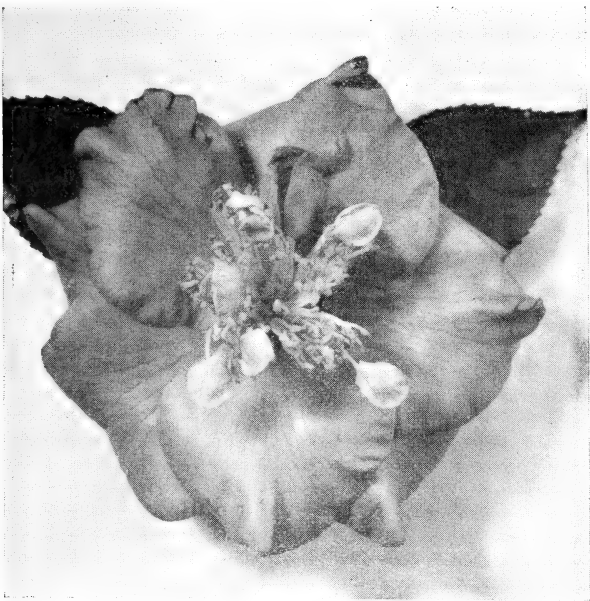

Semi-double flower 5 to 6 inches in diameter, consisting of 15 large petals of a snowy white and porcelain texture and numerous yellow stamens in the center. The anthers of the flower is very large and shaped like an arrow or spear, very distinct from other varieties. Blooms mid-season. Leaves are large, narrow and long, smooth, very shiny dark green.

Camellia "IMURA"

RED HIBISCUS—(Our Seedling I)

The color of this flower is a deep pink to a bright red. Usually the flower is semi-double in form, but often the stamens are changed to small petalets to form a flower of the peony type.

RED HIBISCUS

The flower measures 4-5 inches in diameter. Leaves are stiff and serrated and borne on strong upright branches. An early bloomer.

SMILING BEAUTY—(Our Seedling J)

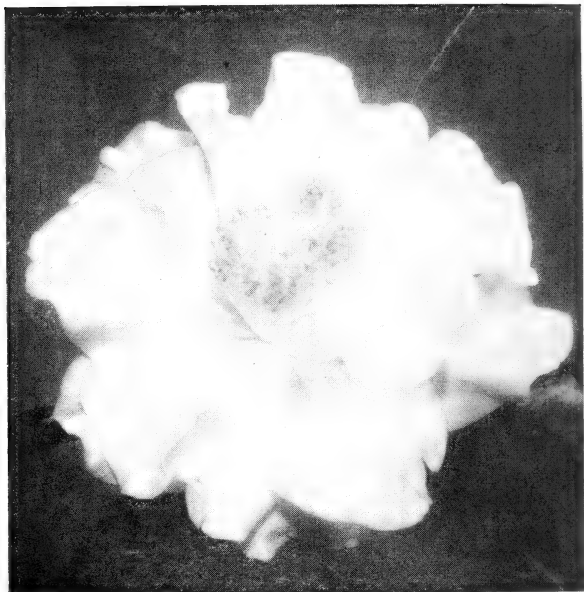

The flower is semi-double, $3\frac{1}{2}$ - $4\frac{1}{2}$ inches in diameter, and has fourteen to sixteen obovate petals of a most pleasing and distinctive delicate pink which is slightly deeper in color than Magnolia Flora.

VICTORY WHITE—(Our Seedling D)

Flower is semi-double, of the peony type, measuring 4-5 inches in diameter. Pure white in color. Numerous small petalets intermixed with yellow stamens at the center. A very heavy bloomer at mid-season.

WHITE EMPRESS—(Our Seedling M)

A very large semi-double flower of pure white in color. The flower resembles Empress (Lady Clare) in shape. Blooms early to mid-season.

WHITE EMPRESS

WHITE HIBISCUS—(Our Seedling O)

Single to semi-double flower of 4-5 inches in diameter. The petals are long and narrow and of snowy white. This variety resembles very closely the Imura, the only difference being that there are fewer petals that are more simply arranged in this variety. An early bloomer, blooming about Christmas time. The leaves, long, narrow and crinkled are borne on long slender twigs.

WHITE KING—(Our Seedling K)

The flower is semi-double, 4-5 inches in diameter, and has petals that are thick and large and of a porcelain texture. The color is snowy-white with numerous yellow stamens at the center. Leaves are thick and large.

WHITE QUEEN—(Our Seedling A)

A very large semi-double flower sometimes measuring over six inches. The petals are pure white,

somewhat small and pointed at the tips. An early to mid-season bloomer. The leaves are thin, curled and deeply serrated.

LURIE'S FAVORITE (Our Seedling #172)

Semi-double flower 4 to 5 inches in diameter. Has 16 to 18 petals which are crinkled and resemble crepe paper in texture. Color: soft lavender pink with darker veins. Blooms abundantly in mid-season. Leaves very small, roundish, smooth and very shiny dark green. Compact grower.

QUEEN BESSIE (Our Seedling #127)

Semi-double, 3½-4½ inches in diameter, very wavy large petals and numerous yellow stamens. Color: clear white with faint flushes around the center presenting a very soft and delicate appearance. One of our best hybrids. Blooms late season, rapid grower with large green dark leaves.

RISING SUN (Our Seedling #177)

This is one of the best single flowered Camellias that we have. The flower which is 4 to 5 inches in diameter opens flat showing 6 large petals and numerous yellow stamens. Certainly a beautiful flower—bright crimson red of velvety softness. Anthers are a bright yellow, filaments pink.

SARA-SA (Our Seedling #119)

Semi-double flower 4 to 5 inches in diameter. Has 12 large petals and yellow stamens at the center. Flesh color dotted and striped with darker pink. Blooms mid-season. Large leaves; very vigorous grower.

WHITE PINE CONE (Our Seedling #179)

Flower semi-double, 3 to 4 inches in diameter with 16 narrow pointed incurved petals. This flower is quite different from all others in shape. It resembles a pine cone before it opens. Pure white in color, blooms late. Leaves large and thick, rapid grower and very hardy.

FRIZZLE WHITE (Our Seedling #128)

Semi-double, 3½-4½ inches in diameter, very wavy crinkled petals intermixed with numerous yellow stamens. Resembles Super Nobilissima but much larger. The flowers are pure white. The leaves are small narrow and pointed.

TRICOLOR SUPERBA (Our Seedling # 158)

The flower, much larger than Ordinary Tricolor, is semi-double, consisting of 12-15 large petals and numerous yellow stamens at the center. The color varies from nearly white to solid red, but the majority of them are white striped with red, or a light pink with white margin like the Herme flower.

HERMESPORT

We originated this new variety from Herme and have been watching this plant for more than ten years. We have found that the new characteristics are firmly established. The flower is very large, 4-5 inches, semi-double peony type, much heavier than ordinary Herme. Color, dark crimson with white spots. Very beautiful.

Prices on above 8 new camellias:

RARE CAMELLIAS

These varieties, new and old, are the finest and still very scarce today. We have added this year a number of very rare varieties in this group. Our supply is very limited. Please order early for your needs. No discount on this group.

* Indicates that we can supply only grafted plants.

GROUP I

ADOLPH AUDUSSON VARIGATED

Very large semi-double flower, resembling Nagasaki. Deep red marbled with white. Blooms mid-season.

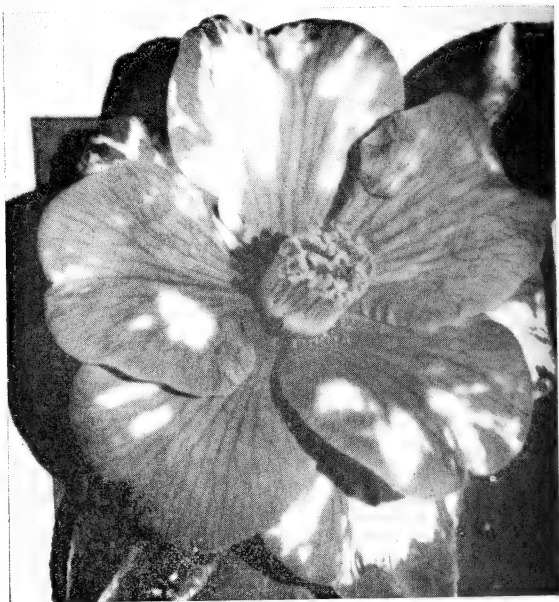

ADOLPH AUDUSSON VARIEGATED

DONKELAARI—(True type)

An old variety, but still holds the highest admiration, and is very scarce. Flower is very large 5 to 6 inches in diameter consisting of 18-20 large petals and numerous yellow stamens in the cen-

ter. Color, dark crimson red, mottled with white. Blooms mid-season; slow grower with small foliage.

DONKELAARI—(True type)

DONKELAARI EUGENE LIZE

(Lady Jane Grey)

Semi-double flower, generally loose peony type; 4-5 inches across. Color, beautiful cherry red, well marked with white. Foliage small, slow grower like Donkelaari.

*** DONKELAARI—(Tea Garden type)**

Same type flower, foliage and habit as the Georgia type Donkelaari, but flower of this strain has more white variegation.

*** DUCHESS OF SUTHERLAND**

Large. semi-double flower. Color pure white except one petal is marked with a narrow pink stripe. Very free bloomer during mid-season.

* FIRE GOLD

Recently introduced to the market by Gerbring. Very large flower of semi-double to loose peony type. Color, crimson-carmine; blooms mid-season to late.

* HAKURAKUTEN

Large semi-double flower, loose peony type. Pure white in color. One of good white camellias.

* JESSICA

From Georgia. Flower large and semi-double of Hibiscus type. Generally produces solid bright red flowers, but often grafted plants bear beautiful white variegated flowers. Vigorous upright grower.

LA REINE VARIEGATED

Semi-double, very large flower, sometimes measuring over 6 inches. Deep pink or red of slightly margenta casting blotched with white spots. Very beautiful and attractive blossoms at mid-season. A good grower with large foliage.

* LINDSAY NEIL

One of the extremely rare camellias. From Columbus, Georgia. The flowers are semi-double or somewhat loose poeny type, 4-5 inches in diameter. Color, variegated dark red and white. Low spreading habit in growth. Our supply of this variety is very limited.

Price as follows:		Each
12-15" graft, one year top.....		7.50
15-20" graft, one year top.....		10.00
20-24" graft, one year top.....		12.50

* LOTUS—(Sode gakushi)

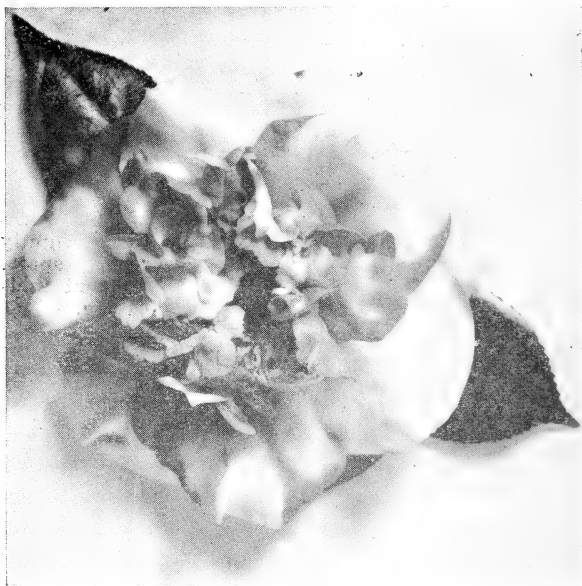

Semi-double and opens like a lotus flower with numerous yellow stamens at the center. Pure white in color.

MAGNOLIAFLORA

This variety is a great favorite among Camellia lovers. The flower is semi-double, medium to large. Color beautiful delicate shade of blush pink.

MAGNOLIA KING

This is the same variety as Gigantea, but our strain produces more peony type flowers and shows more white variegation than ordinary Gigantea. We are, therefore, keeping this strain under the name Magnolia King. Whoever sees this flower in bloom in our Camellia house cannot help but add this variety to their camellia collection.

MAGNOLIA KING

MARTHA BRICE

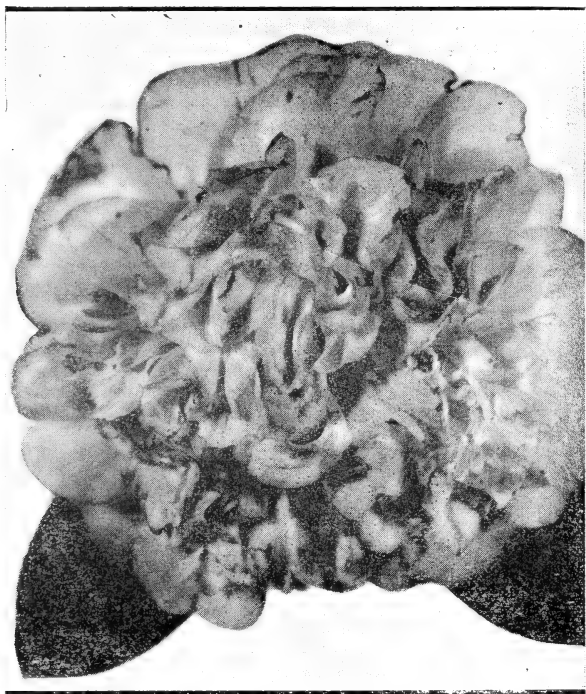

New Camellia—a seedling from Quitman, Georgia—Flower is semi-double, loose peony type. Color, delicate soft pink. Blooms mid-season. Leaves are very large, roundish, of rather thin texture, deeply serrated.

MENA LADNIER—(Duncan Bell)

This new variety was originated by Mrs. Wilhelmina Ladnier of Pascagoula, Miss. Many years ago she planted many Camellia seeds and this won-

derful flower came out among them. We have named this variety "Mena Ladnier," honoring the originator by her consent.

The flower is full double, 4½ to 5 inches in diameter. There are 24 guard petals and 90 to 100 small petalalets which compose a peony form. The color is usually brilliant blood red, but occasionally a flower slightly marked with white is found, also solid pink flowers may bloom on the same tree. The flowers bloom mid-season. This variety grows very vigorously and has thick, heavy, coarse branches. The leaves are exceptionally large and are very shiny dark green.

Camellia. Mena Ladnier

* **Mme CHIANG KAI SHEK**

Large semi-double flower of the Donkelaari type. Dark red beautifully marked with white.

* **MRS. CHAS. COBB**

Large semi-double flower, loose poeny type. Color, dark crimson red, almost black.

REV. JOHN BENNETT—(Magnolia Garden type)

Semi-double flower, very large 5-6 inches across. Beautiful salmon pink in color. Blooms mid-season to late.

* **ROSEA SUPERBA**

The flower and foliage very closely resembles Julia Drayton, its only difference is that the color of this variety is deep pink.

ST. ANDRE—(McIlhenny)

Semi-double, generally loose peony shape. Very large, 5-6 inches across. Beautiful color of crimson-carmine; blooms late. The foilage is very large, thick very dark green.

ST. ANDRE

RARE CAMELLIAS, GROUP II

* AKEBONO

Medium sized, semi-double flower of beautiful light salmon pink. Arrangement of the petals gives to this flower a distinctive and different appearance from other camellias.

* AKEBONO VARIEGATED

Same as above, but flowers of this variety are variegated with white.

* ARAJISHI—(Aloha)

This is the earliest bloomer of all camellias. At our nursery it starts blooming in August and continues to January. The flowers are large, peony type resembling the Prof. Sargent. Early flowers are lighter in color, but later become deep crimson red. Very rapid grower with deeply serrated leaves.

* ASPACIA—(Emperor Variegated)

Flower, foliage, growing habit same as Emperor, but the flower is variegated beautifully with white. (We can supply this only 6-8 and 8-10 inches own root plants and in grafted plants).

* CATHERINE CATHCART

One of the old, but very rare varieties. The flower is medium in size, full double, imbricated. Delicate pink marbled beautifully with white. Large, roundish, thick foliage, well serrated. Slow grower. (can supply 6-8, 8-10 inches from pot, and grafted plants).

* C. M. HOVEY—(Paulina)

Very large flower, full double, imbricated; dark crimson red marbled with white. When the flower is full open, especially of late season, it shows some yellow stamens. Its growing habits, foliage, as well as shape of flower verly closely

resembles *Mathotiana Rubra* and we believe it is a sport of the latter variety.

COMTESSE NIEPORT

Full double, peony form; petals are very crinkled, soft pink spotted with faint white. Blooms very freely mid-season.

* **DAIKAGURA**

Very early; starts blooming in September. The flower is double, peony form, very large, deep rose in color.

* **DAIKAGURA VARIEGATED**

Same as above variety, but flower is variegated beautifully with white spots.

* **DEBUTANTE—(Sara C. Hastie)**

Early bloomer, usually starts blooming before Christmas. The flower is full double, peony form, very delicate soft pink.

* **DR. W. G. LEE**

A seedling from Georgia. Large flower, semi-double or nearly single. Dark crimson red. Profuse and dependable bloomer. Slow grower with spreading habit.

EMPEROR

Large double flower of peony form. Dark crimson red in color. Very large, roundish, thick foliage.

EMPRESS—(Lady Clare, Grandiflora Rosea)

Very large flower, many measuring over 6 inches across. Semi-double flower with large petals. Light pink in color.

* **EMPRESS VARIEGATED—(Sport of Empress)**

Flower variegated pink with white. Can supply only grafted plants.

* **FIMBRIATA ALBA**

Resembles *Alba Plena* very much, but the edge of the petals of this variety is beautifully serrated. Can supply 6-8 inch own root or grafted plants.

GIGANTEA—(Magnolia King, Kellingtonia)

Very large flower, 5-6 inches across, usually semi-double with a large group of yellow stamens in the center. In some cases, however, the yellow stamens change to numerous petals and forms a perfect peony flower. Color, dark crimson marked with white spots. Leaves are extra large and thick, very dark, shiny green.

* **GIRARD DE BAILLON—(Collettii Maculata)**

Most charming Camellia. The flower is not very large, but it is an attractive form of peony type with charming color combination of brilliant red and white. A slow grower.

* **GLEN 40—(Temporary name for old lost label tree)**—The flower is full double, rose type, resembles Colonel Firey, but slightly larger in size and the flower is more scarlet in color. Leaves are thick and stiff with a dull point. Very slow grower. We offer only grafted plants.

H. A. DOWNING

Semi-double flower, very large. Color is bright crimson to carmine red; seldom spotted with white.

* **HIBISCUS—(Magnolia Garden)**

Large single flower, measures 5 inches across. Composed of 6 large petals and numerous stamens formed cylindrically at the center. Color, deep pink. One of best single varieties.

JULIA DRAYTON

Very large flower, full double, imbricated. Color dark crimson; resembles Purple Emperor very much.

LADY HUMES BLUSH

Famous old variety, yet rare. Full double, rose type flower, white with delicate flesh pink. One of best for corsages.

LAUREL LEAF

One of the favorite varieties. Very large flower, full double, imbricated, petals reflex and overlap each other symmetrically. Color, widely ranging from light salmon pink to deep rose, usually blotched with white. Leaves are narrow and pointed like a Laurel leaf.

MARCHIONESS OF EXETER

Full double, peony type, large flower of soft pink. Blooms mid-season.

* **MARGHARITE CALEONIE**

Medium size flower full double, imbricated. It is variegated bright red with white.

* **MATSUKASA**

This flower is very different from all other camellia flowers. Its cylindrical shape with narrow and pointed petals resembles closely the Southern Pine cone. Color, rose red speckled with white. Slow grower.

* **NAGASAKI**

This is one of the largest flowered camellias. It usually measures 5 to 6 inches in diameter. Semi-double flower, color usually white on soft pink ground; very beautiful. Blooms early to mid-season.

* **PINK BALL**

Medium size, peony form, round shaped flower of soft pink. Leaves are large, well serrated, light green. Can supply only grafted plants.

* **PINK STAR**

Large peony type flower of bright rose-pink. Outer row of petals from a somewhat star-like appearance. Blooms mid-season. Can supply 6-8, 8-10 inches own root, or in grafted plants.

PRIDE OF GREENVILLE—(Local name)

Flower very large, full double, peony form, bright red in color; mid-season. Upright grower.

PURPLE EMPEROR

Very popular and favorite variety. Flower very large 5-6 inches across, imbricated, dark crimson red with a purplish casting.

* **PURPLE PEONY—(Wm. Penn)**

Flower semi-double peony type of medium size. Very dark crimson to deep purple color with large white blotches. Slender branches somewhat drooping. Some leaves deeply serrated.

* **ROSE DAWN**

Recently introduced from Mobile. The flower is large, full double, imbricated. Rose pink in color. Vigorous grower with slender branches.

VEDRINE — Semi-double to double peony form flowers, 4 to 5 inches across, often 6 inches. Color, brilliant red shading into a deep crimson of a velvety tone; very beautiful. Blooms mid-season.

VICTOR EMANUEL—The finest camellia that we know today. Very large loose peony shaped flower (5 to 6 inches across). Deep velvety red in color, most exquisite, late bloomer.

STANDARD CAMELLIAS, GROUP I

AUGUSTA WILSON—It is our great pleasure to have named this variety "Augusta Wilson" in memory of a famous writer of Mobile. She was very fond of this variety and planted it in the gardens of her home in Ashland Place many years ago.

The flower is very double and peony type, 3½ to 4 inches in diameter. It is a soft pink; some flowers are marked with faint white spots. Blooms before Christmas. Leaves are large, thick and roundish.

ALBA PLENA—Very famous old variety, yet very scarce. Flower is full double, pure snowy white. One of the best whites, but tender.

CHANDLERI ELEGANS—Semi-double to double peony type flower. The flower, one of the largest of all Camellias, is a pretty cherry red with white variegations. Blooms mid-season; slow grower.

COLONEL FIREY (No. 47)—The flower is 4 to 5 inches in diameter with 90-100 symmetrically overlapping petals. Bright red to deep vermillion red. Blooms in mid-season to late.

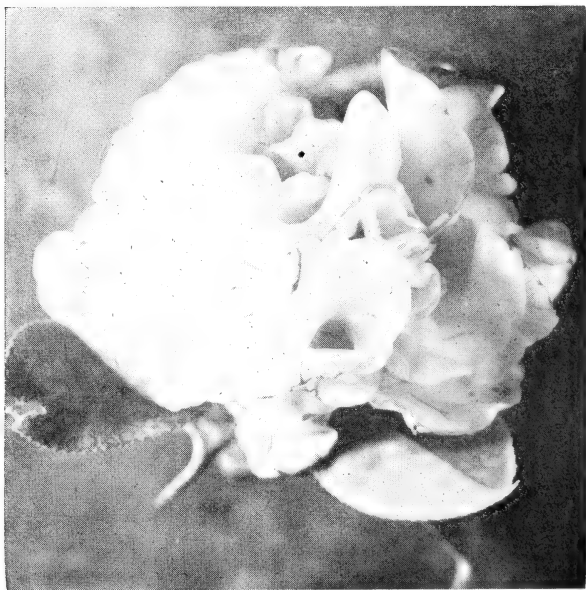

DAINTY—The single flower, 3 to 3½ inches in diameter, is bell shaped. Has five petals of soft pink and numerous yellow stamens. A tree loaded with blooms is a charming sight.

FANNY BOLLIS—Large semi-double flower, red blotched with white.

GOVERNOR MOUTON—A famous variety from Louisiana. A large peony type flower, oriental red marked with white spots. Free bloomer at mid-season.

LADY VAN SITTART VARIEGATA—One of the most beautiful of variegated Camellias. Semi-double flower 3½ to 4 inches in diameter often reaches 5 inches. Pure white base striped with various shades of red. Leaves are small and narrow, very crinkled. Grows upright and compact.

KUMASAKA—A Japanese variety. Large peony type flower of deep pink.

Camellia Monarch

MARY E. M. (From Jungle Gardens)

Large salmon pink flowers, semi-double. Blooms from mid to late season. Vigorous grower and free bloomer.

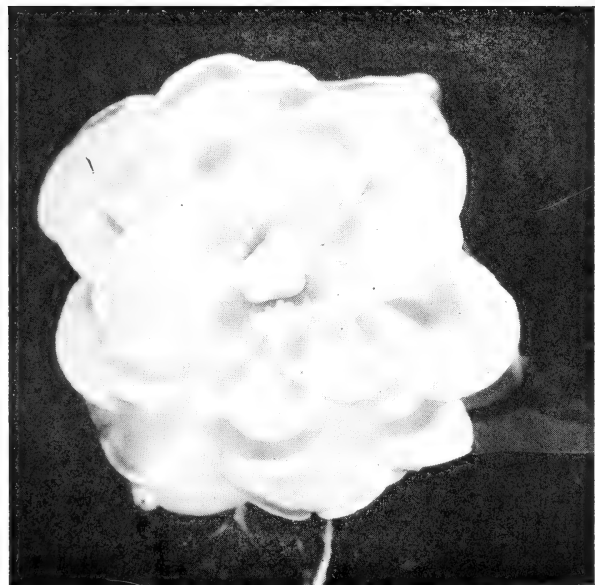

MONARCH—(Gunelli, Honneur D' Amerique)

Peony type flower of deep pink often spotted with white. Blossoms often measure six inches across.

MONJUSU RED—Semi double, medium size flowers of brilliant carmine red with a satin like sheen. Very compact grower with small, glossy, extra dark green leaves.

PURITY—Pure white, full double flower with open center.

SEMI-DBLE BLUSH—Beautiful flower of medium size of a very pleasant blush color.

Camellia Teutonia, Pink

SWEETI VERA—Flower large, semidouble Peony type. Flesh pink ground marked by small stripes or dots of deeper pink. Blooms early to mid-season.

TEUTONIA—Full double rose type. The tips of the petals are curved in; petals overlap each other symmetrically. The original tree produced various colors—fleshy pink, white faintly striped with pink and dark. Very slow and compact grower.

Prices on Standard Group I—

	Each	10	100
6-8 inch from pot.....	.50	4.00	35.00
8-10 inch from pot.....	.75	6.00	50.00
10-15 inch, lath house, B&B	1.00	8.50	75.00

24-30 inch, lath house, B&B	3.50	30.00	

Price on larger sizes, field grown plants on application.

STANDARD GROUP II

ANNA FROST — Semi-double, large loose peony type, dark blood red in color. Large, round and thick extra shiny dark green leaves.

BELLA ROMANA—Full double flower 3 to 3½ inches in diameter made up of 70 to 80 petals. The flower is very soft pink striped profusely with dark crimson.

CAMEO PINK—Full double, rose type flower of medium size. Color light pink. Very desirable for cut flower.

CANDIDISSIMA—Very double flower of medium size. Petals overlap each other symmetrically forming a star. Pure white bloom in late season.

COUNTESS OF ORKNEY—Large, very double rose type flower. The usual color is white with pink stripes, but sometimes solid pink flowers appear on the same bush. Slow and compact grower, but blooms very young. Fine variety for pot culture.

DERBYANA (J. G. Peonyflora)—Very large flower blooms late season. Semi-double to double peony type. Dark crimson in color. Very vigorous grower.

ELLEN McKINSEY — Flower medium to large, peony type, dark crimson spotted with white. Blooms very early, preceded only by Daikagura. The leaves resembles Prince Albert.

FLESH PINK PEONY (Shell Pink by McIlhenny)
One of the latest bloomers. It starts blooming when most of the other varieties are through blooming. The flower is medium, peony type of beautiful flesh pink. It is a heavy bloomer and compact grower.

HARLEQUIN (formerly called by us Abby Wilder Pink)—Full double peony type flower, medium size, flesh color. Very beautiful.

HERME—Very large semi-double flower variegated pink and white. Generally, the margin is white. A very popular variety.

IMPERATOR—Full double peony type, medium size flower of brilliant Christmas red. Very attractive.

IL TRAMONTO (different from LAUREL LEAF)
Flower medium size, full double, rose type. Resembles Laurel Leaf, but smaller in size. Stocky grower with large, round, thick foliage.

LADNIER'S RED—(Prince Eugene Napoleon, Pope Pius IX, etc.)—Large flower, very double, bright red to dark red, sometimes spotted with white. Hardy and a free bloomer.

LADY VAN SITTART—Very large flower semi-double, of a most pleasant shade of red. Blooms freely mid-season. Very small and narrow pointed leaves, crinkled and very shiny dark green. Upright grower.

LADY SAUMAREZ—Large single to semi-double flower. Brilliant dark red with white spots. Resembles Donkelari, but smaller. Early and free bloomer.

MARIE LOUISE (No. 60) — Double peony type flower of medium size. Pleasant red marked with white—very beautiful. Slow grower and has spreading habit.

MATHOTIANA ALBA—Large full double rose type flower, pure white but occasionally striped with faint pink. Leaves very large and thick.

OPELOUSAS PEONY—(Althea Flora by some Nurseries)—Peony form flower with light pink and white; occasionally they are solid pink.

OTOME—Full double, flesh pink with darker veins. Much like Pink Perfection.

PINK PERFECTION—Most popular variety. Full double, light pink. Early and free bloomer.

PROF C. S. SARGENT—Full double, peony type, tightly formed. Very dark red color. Blooms freely mid-season. A very popular variety.

STILE'S PERFECTION PINK—(Formerly called by us Rubra Virginalis)—An outstanding variety. Peony type flower 3½ to 4 inches in diameter. Pleasant soft pink color. Early and free bloomer. Small leaves.

TRICOLOR WHITE—A sport of Tricolor. Pure white semi-double flower with yellow stamens in the center.

TRI-COLOR SIEBOLDI—Semi-double, variegated of pink and red with white. Attractive flower, and heavy bloomer. One of dependable varieties for out-door planting.

LATE TRICOLOR—This variety was obtained from the West Coast. Flower is much larger than original Tricolor. Blooms very late.

WM. DOWNING—Semi-double, large flower, 4 to 5 inches in diameter, 9 to 12 large, straight, thick petals which are purplish pink or red. Very vigorous grower and very resistant to cold.

CAMELLIA JAPONICA

Left to Right: 2¼ inch Pot; 8-12 inches lathhouse, B&B; 12-18 inches lathhouse, B&B

STANDARD GROUP III

BROOKLYANA—Very double, medium sized flower; deep pink mottled with white. Blooms early. Leaves large and thick. Vigorous grower.

CARNATION—(Rose Emry, Orient, etc.)

Medium sized peony type flower. Dark red crimson blossoms look like carnations. Very hardy.

CHEERFUL — Double, medium sized rose type flower. Deep pink, blooms very early. Upright grower.

CREO PINK—Large single flower, 4 to 4½ inches in diameter. Flower has 7 large wavy petals and numerous yellow stamens which forms a cylindrical mass in the center. Color, purplish pink with darker veins.

DIXIE — Medium sized flower, very double, rose type. Rose pink petals symetrically formed.

DUKE DE ORLEANS (Marguerite Guillon)—Large flower, peony type; creamy white striped and dotted with pink and red. Hardy and blooms well.

ELATA — Very large semi-double flower. Semi-peony type with yellow stamens. Deep rose to carmine color. Blooms mid-season.

ELIZABETH — Flower double, medium, usually white but often striped with faint narrow pink stripes. Very strong grower.

GLORE DE NANTES—Large semi-double flower, deep rose color. Leaves are large, roundish, thick and very shiny dark green, which easily identifies it from all other.

JARVIS RED—Large semi-double flower with long crinkled petals. Dark vermillion color. Very popular on the Gulf Coast.

MRS. HOFFEINS VARIEGATED — Large semi-double flower, white striped with pink. Sometimes a solid pink flower is produced on the same bush.

PRINCE ALBERT—Flower, medium sized, peony type, soft lavender-like pink spotted with white. Leaves are deeply serrated and rather light green.

RUBRA VIRGINALIS — (Formerly called Jeanerette Pink by us). More familiar along the Louisiana coast. Loose peony type, salmon pink. Very fast grower.

SARAH FROST—Very popular on the coast. Dark crimson, full double rose type. Hardy.

TRICOLOR—Large single to semi-double flower, white striped with pink. (Once in a while it produces a red flower.)

T. K. VARIEGATA—Semi-double, medium size flower of light pink with darker pink margin. Blooms well regardless of the weather. One of the most dependable varieties.

Prices on field grown specimen upon application.

CAMELLIA SASANQUA

Despite its recent introduction to this country, the Camellia Sasanqua has already become widely known and is gaining popularity among flower-lovers with wonderful rapidity. It blooms ahead of Japonica by months—generally from September to December. Size of blossom is about the same as Camellia Japonica in different colors. Leaves are much smaller and the branches are slender, which appearance gives a softer tone to landscaping. It has value also as a pot plant.

CLEOPATRA

Semi-double peony type, 3 inches in diameter. Rose pink in color. Very compact grower.

Rooted cuttings		10.00

3-4 feet, field, B&B	3.00	

DAWN (Akebono)

This is the hardiest Sasanqua of all, withstanding the severest freezes. When the buds of the other varieties are frozen its blooms stand perfectly. The flower is single to semi-double ivory white with flesh pink at the margin of the petals and yellow stamens. The leaves are small, nar-

row, dark shiny green. Very compact, symmetrical pyramidal shape; slow grower.

NEW CAMELLIA SASANQUAS

The following sasanquas were developed and introduced by us:

1. MUTT'S WATERMELON PINK

Tall and slender; beautiful watermelon pink flowers.

2. JEFF'S WATERMELON PINK

Short with rosetted branches. Large flower of watermelon pink.

3. ROSEA PAPAVER

Large single flower shape of poppy. Delicate soft pink.

4. CRIMSON VELVET

Large single flower with 7-9 petals. Color, crimson red of velvety tone.

5. WILLOW LEAF

The leaf is very narrow and long like a willow leaf. Flower, single, white with pink margin.

6. ROSEA GRANDIFLORA

Large flower with 7-9 petals, light soft pink.

7. LAVENDER QUEEN

Single Flower, deep lavender pink.

8. TRICOLOR MAGNIFICA

Flower single; color, beautiful three tone—white in center, outer edge of lavender and between these two colors filled by soft pink.

9. GRANDIFLORA ALBA

Flower single, very large—4 to 4½ inches in diameter—; snow white.

10. FLORIBUNDA

Single, white with lavender margin, heavy bloomer upright grower.

ORIENTAL MAGNOLIA

There is nothing as gorgeous as the Oriental Magnolias when in full bloom in early Spring. It is most highly esteemed in England, and it is gaining more popularity in the United States every year.

MAGNOLIA DENUDATA HYBRID

M. DENUDATA

Well known as M. Conspicua. Very large white flower, 7 to 9 inch in diameter. Flower appears in early spring before its leaves come out. It is a most beautiful sight.

	Each	10	100
2¼" pot (Spring delivery)	.50	3.50	
18-24 inch, field, B&B	2.00		
24-30 inch, field, B&B	3.00		
3-4 feet, field B&B	5.00		

M. DENUDATA HYBRID

Hybrid seedling of above variety. Flower, very large, 9 petals,color ranges from white with pink to almost white; leaves very large.

2½" pot, (Spring delivery)	.40	3.00	25.00
2-3 feet. field, B&B	2.50		
3-4 feet, field, B&B	4.00		

M. DENUDATA PURPLIANA

This hybrid has been so named temporarily. Very large flower, 9 petals; color, bright clear redish purple. Leaves slightly smaller than other Denu- data Hybrids. Vigorous, upright grower.

2½" pot (Spring delivery)	.50	3.50	30.00
2-3 feet, field, B&B	3.00		
3-4 feet, field, B&B	5.00		

M. ALEXANDRINA

Hybrid of Magnolia Denudata and Magnolia Liliflora. It is similar to M. Soulangeana, but grows much taller and both the flower and foliage are larger. Large flower of nine petals, heavily flushed rose purple with darker lines. Leaves somewhat curled and of a very soft texture. In our nursery Alexandrina blooms from a week to 10 days later than Soulangeana. Hardy and vig- orous grower.

2½" pot (Spring delivery)	2.50	20.00
3-4 feet, B&B	3.00	
4-5 feet, B&B	4.00	
5-6 feet, B&B	6.00	

M. LILIFLORA

Lily shaped flower, 6 petals; dark purple outside and creamy white on the inside; many stems from the ground, bushy type. Late bloomer.

2½" pot (Spring delivery)	2.00	15.00
4-5 feet, field, B&B	3.00	

M. SOULANGEANA

Most popular variety; also known as "Saucer Magnolia". Flower, white with rose pink base. Most profuse bloomer. Early.

	each	10	100
2½" pot (Spring delivery)		2.50	20.00
3-4 feet field, B&B.....	2.50		
4-5 feet, field, B&B.....	3.50		

M. SOULANGEANA NIGRA

Similar to M. Liliflora except it is much darker purple on both sides of the petals. Also very heavy bloomer.

2½" pot (Spring delivery)		2.00	15.00
2½" pot, 2 years old.....	.40	2.50	20.00
18-24 inch, field, B&B	1.00		
2-3 feet, field, B&B	1.50		

M. SOULANGEANA LENNI

Flower large saucer shaped, very dark vermilion red. Late bloomer.

2½" pot (Spring delivery)	.40	3.00	25.00
2-3 feet, field B&B	2.50		
3-4 feet, field B&B	4.00		

M. SOULANGEANA, DARKEST PURPLE

This new variety was established from some seedlings. The growth and habits resemble M. Soulangeana Nigra, but the flowers are larger and they have nine petals instead of the six petals of the former. Color is much darker, almost black.

2½" pot (Spring delivery)	.40	3.00	25.00
2-3 feet, field B&B	2.00		
3-4 feet, field, B&B	3.00		

M. STELLATA

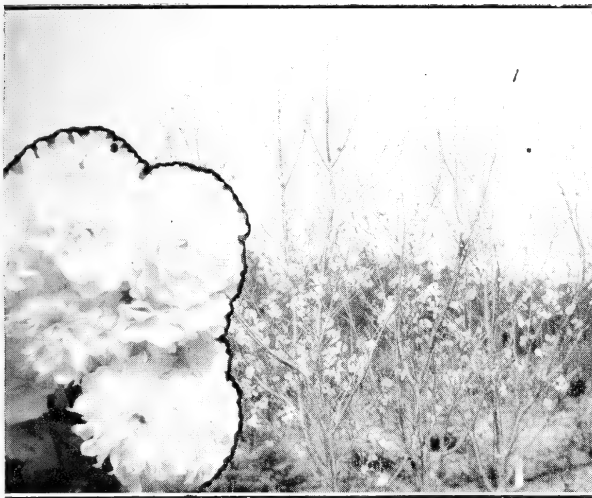

(Star Magnolia)

Rather dwarf. Flower is much smaller than the other varieties. It is a profuse bloomer of dainty, delicate pinkish white, star shaped flowers. A great favorite in the Spring garden.

2½" pot (Spring delivery)		2.50	20.00
---------------------------	--	------	-------

FLOWERING CHERRY

Heretofore it was believed by many Southern gardeners that the Flowering Cherry tree could not be successfully grown down South. It is now, however, proved by us that they can be, if the varieties best acclimated are used. You are invited to visit us and see for yourselves thousands of them thriving wonderfully and blooming in our nursery grounds.

Flowering Cherry
Four years old Yedoensis Cherry
 Inset is blossom of Fugenzo Cherry

PRUNUS YEDOENSIS (Somei-Yoshino)

As this variety grows so rapidly and to a large sized tree, it is planted in such places as parks, school yards, along the river banks and roadsides. The flower is rather small, 3-6 flowers in a corymb or cluster. Flowers are pinkish white in color, slightly fragrant. It blooms profusely before young leaves sprout.

	Each	10	100
8-12 inch, from bed, BR.....		1.25	10.00

RHODEA JAPONICA

A fine house plant which somewhat resembles the Sanseveria, but is more noble and artistic in appearance. It has dark green curled leaves and spikes of creamy white flowers followed by showy red berries. It is very hardy to cold weather, or it can be planted in rock gardens where the climate is mild. It is adapted to dark, shady places. This is one of the rare plants of this country.
